

## 1. Release Notes

Version: 1.3b13-bwifi-2010\_02\_11-4port

### **1.1. Changes**

Add ability to configure Gateway for DHCP server. When using the Access Controller as the DHCP server but it is not the default gateway for the network. Be sure to configure DNS server IP addresses on the General setup page and ensure that the DNS forwarder is disabled.

Properly display channel information for newly discovered APs on the AP configuration page.
